Those with a Cornell netid start here: https://cornell.zoom.us/

Upper Right: Sign Up/in
and the page will look like this:

Using your netid and the password associated with your netid, login.
You will be issued an exclusive Personal Meeting ID and relevant information; it will look like this:
To Host a Meeting:
  Click “Host a Meeting” in the upper right. You’ll have two options:
  With Video Off (for this exercise select this)
  With Video On
It commences with installing the software; the page will look like this:

Pay attention to the directions in your particular browser here. In Windows, this is what it looks like.

When Zoom software is installing, this window will pop up:
If you launched a “Video Off” meeting, the page will look like this:

![Zoom Meeting Page](image1.png)

It suggests you test the speaker/microphone. I needed earbuds, so it is important to do this test. Turn up your speakers, adjust as necessary; use earbuds if you need them. When finished, click yes. The page will then look like this:

![Zoom Meeting Page](image2.png)

To the right you have “Invite Others” option (you can also use the “Invite” Feature at the bottom. You’ll also see other options there, as well – there’s a chat window that launches, for an interactive meeting.

When you’re done with the meeting, click X in upper right to either leave the meeting or end the meeting; you can do the same in the lower right, as well.
If you launched the “Video On” feature, the window would look a little more like this:

The same options are available here: to the right you have “Invite Others” option (you can also use the “Invite” Feature at the bottom. You’ll also see other options there, as well – there’s a chat window that launches, for an interactive meeting.

When you’re done with the meeting, click X in upper right to either leave the meeting or end the meeting; you can do the same in the lower right, as well.
